

Milena Ortiz Torres

amilenaort@gmail.com

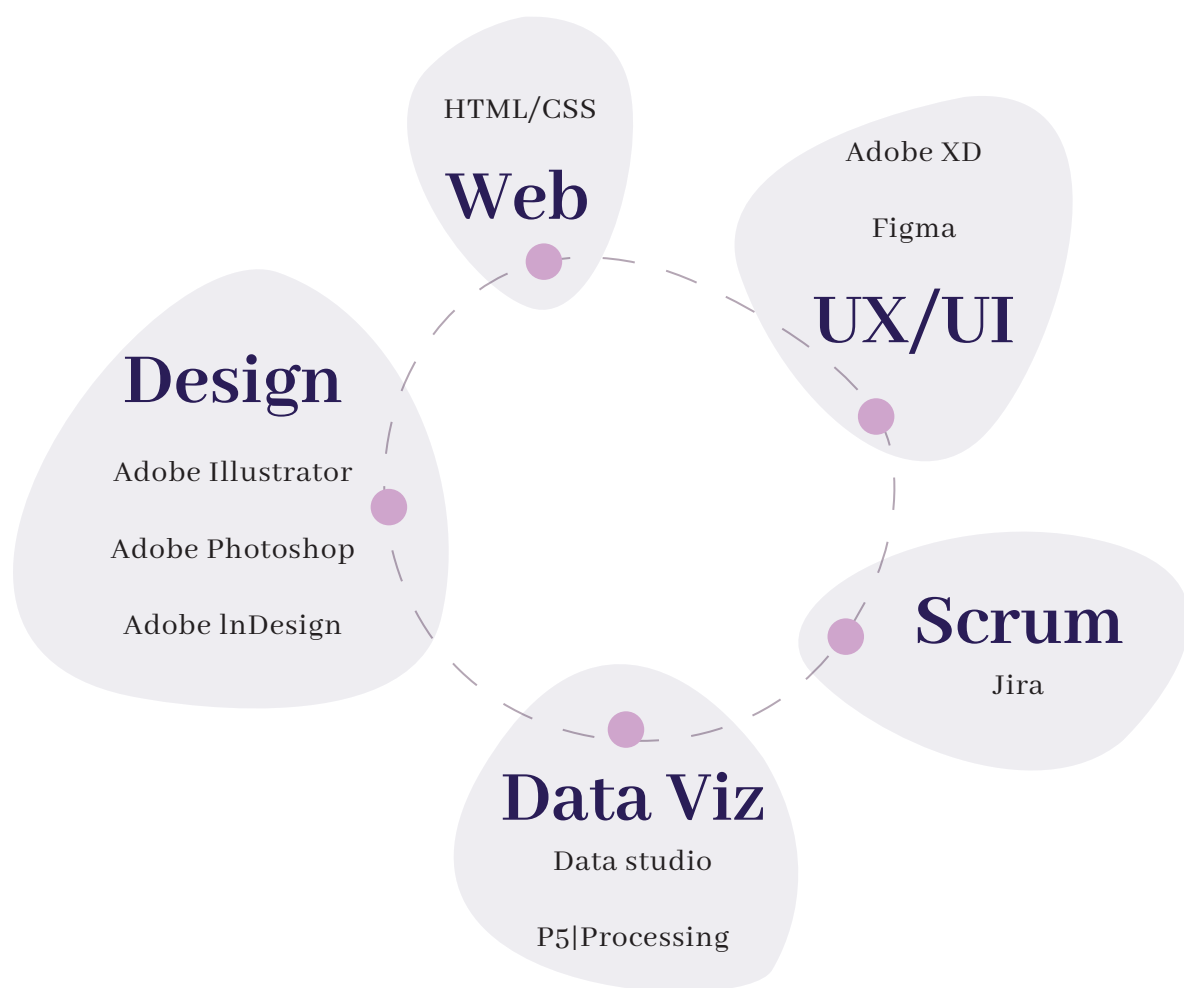

Bogotá, Colombia

I am an Architect by profession and I am currently doing a master's degree in Digital Humanities. During my professional career I have had the opportunity to create a direct relationship with design, which has led me to experience areas such as editorial design, web and mobile interface design, and lately the design and development of data visualizations.

I like to get out of my comfort zone because it helps me learn more things related to design. For this reason, I like to articulate the field of technology with my knowledge in design, which as a result is the work done in the editorial **Beyond the Book Media** as a freelancer for around 2 years where I have formatted around 70 manuscripts published in Amazon. At the same time, I was the leader of the Digital Laboratory of the **Museum of Memory of Colombia** where my main role was to design interfaces for the exhibitions typed that were going to be published on the main web page.

“ I am passionate about **design** and for me it is a **flexible tool** that allows us to solve social, environmental or technical problems, which due to its **visual power** is efficient and **effective in our society**.

Skills

“ Some of my editorial and design work
