

Milena Ortiz Torres

amilenaort@gmail.com

Bogotá, Colombia

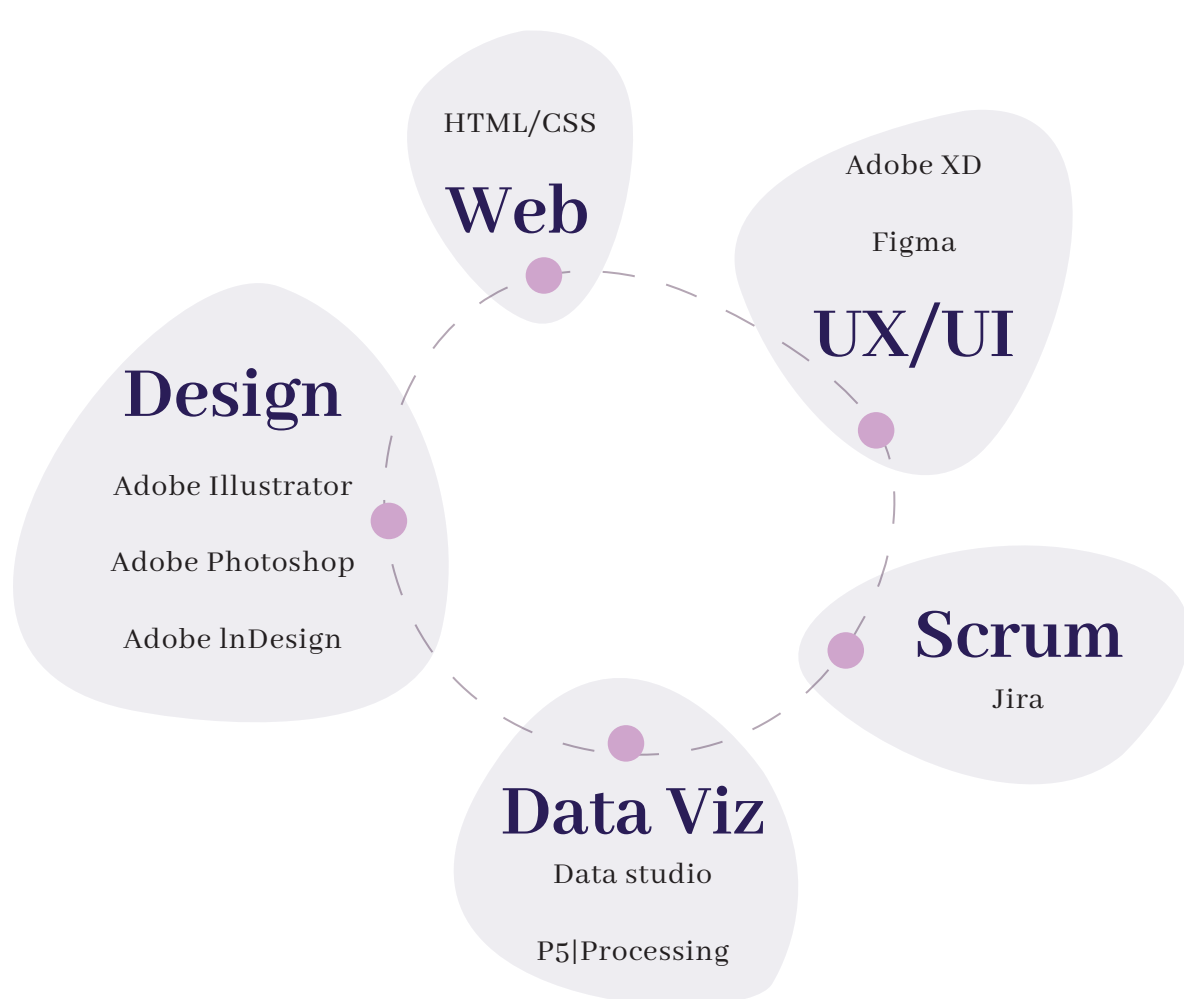

I am an Architect by profession and I am currently doing a master's degree in Digital Humanities. During my professional career I have had the opportunity to create a direct relationship with design, which has led me to experience areas such as editorial design, web and mobile interface design, and lately the design and development of data visualizations.

I like to get out of my comfort zone because it helps me learn more things related to design. For this reason, I like to articulate the field of technology with my knowledge in design. As a result, it was the work carried out in the Museum of Memory of Colombia, where my main role was the design of web and mobile interfaces for the exhibitions and different sections dealing with the internal armed conflict in Colombia, and also the design of the main web page.

I am passionate about **design** and for me it is a **flexible tool** that allows us to solve social, environmental or technical problems, which due to its **visual power** is efficient and **effective in our society**.

Skills

Some of my **design** work and mix of my knowledge
